About Institutes of Technology and Polytechnics

The TEC funds 20 Institutes of Technology and Polytechnics around New Zealand through Student Achievement Component funding.

These organisations range from those receiving funding for 1,009 to over 8,000 equivalent full-time student places.

The type of students at a specific individual Institute of Technology or Polytechnic will influence its performance. For example, part-time and extra-mural students often have work or family commitments and cannot devote as much time and energy to their studies. They may also have different study goals. This can be seen for example with the Open Polytechnic of New Zealand which has a large distance learning roll.

Government expectations of Institutes of Technology and Polytechnics

The Government expects Institutes of Technology and Polytechnics to:

- Enable a wide range of students to complete industry relevant certificate, diploma and applied degree qualifications
- Enable local access to appropriate tertiary education
- Support students with low literacy, language and numeracy skills to improve these skills and progress to higher levels of learning
- Work with industry to ensure that vocational learning meets industry needs

Tertiary Education Strategy

The Tertiary Education Strategy calls for better performance from the tertiary education sector as well as raising achievement for all learners under 25, and for Māori and Pacific learners.

Context
